DETAILED ACTION

Drawings

1. The drawings are objected to because Fig. 1 should be labeled PRIOR ART. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 3 and 9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 2832

4. Claims 3 and 9 recite the limitation "the diagonals" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1, 2, 4-8 and 9-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Masubuchi (US Pat. 6,051,768).

Masubuchi teaches a button for engaging an electrical switch comprising:

a button post 11 (please refer to figs. 1-3B) for transmitting a vertical motion to the button 3 to the electrical switch 13 ;

an alignment post 8 (fig. 2B) that "registers against" the switch 13 and reduces lateral motion of the button (please see fig. 1); and

at least two runners 7 (please refer to a middle button in fig. 3B) that connect the button 3 to a frame 16 and include reinforcement 5 that stiffens the vertical motion of the button (via 5, 6 and 17 as shown in fig. 1; col. 6, line 51).

Regarding claims 2 and 8, Masubuchi discloses multiplicity.

Regarding claims 4 and 10, the alignment post, the runners and the reinforcement are formed from plastic. Masubuchi in col. 8 disclose molding.

Regarding claims 5 and 11, reinforcement 5 is molded along with the runners. Please refer to fig. 1 of Masubuchi.

Art Unit: 2832

Regarding claims 6 and 12, please refer to the Abstract of Masubuchi.

Regarding claims 7 and 13, Masubuchi employs his button switch in a computer (electronic organ with a circuit board 12).

Regarding claims 14 and 15, Masubuchi discloses the means for limiting or reducing vertical and lateral motion for the button as stated above.

Allowable Subject Matter

7. Claims 3 and 9 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Prior art teaches the claimed invention except for the reinforcement comprising "a rectangular panel having two supporting ribs located on the diagonals of the panel."
